It cannot be justly charged, then, that Mr. Hughes is, in reality, less the friend of the worker than is Mr. Wilson. Whether he would in like circumstances, do exactly what Mr. Wilson did is something nobody is qualified to judge, not even the Republican nominee himself. So far as we are capable of seeing, the net result of the entire controversy over the manner and method of the strike settlement is this, that President Wilson did what he believed to be best for the country, according to his lights, and that, had Charles Evans Hughes been in his place, he would have done no more and no less. On both sides, it will be more profitable to turn to something else. The strike is practically set-tled. Many other things are not.—Christian
